## Observations on February.

**Last Quarter** the 6 day, after 10 at night.

**New Moon** the 14 day, 24 min past 3 afternoon.

**First Quarter** the 22 day, near 7 at night.

28	6	24	5	36

**This Moneth** set, cut, and lay **Quicksets** and **Roses**, as all other **Plants**. Set and Plant **Vines**, **Hops**, and all fruit that grows on **Bushes**. Sow **Pease**, **Beans**, and **Onions**; furnish your **Gardens** with **Salads** and **Pot-herbs** for **Summer**. Prune and trim all sorts of **Fruit-trees** from **Moss**, **Canker**, and superfluous **Branches**. Remove **Grafts** of young **Trees**, in the last quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If necessity urge, you may let **Blood**, but be sparing in **Physicks**, and be sure when a warm day comes, to prevent taking of cold, through carelessness; for the warm **Air** this Moneth is not lasting, but oft deceives us to our prejudice.

In this Moneth, **Slimy Fish**, **Milk**, and the like, that do opilate, and stop the **Liver**, and the **Veins**, and thicken the **Blood**, are to be eschued as **Enemies** to **Health**.

## Observations on March.

Full Moon the first day, before six at night.  
 Last Quarter the 8 day, after 9 in the morn.  
 New Moon the 16 day, at 9 in the forenoon.  
 First Quart. the 24 day, 30 m. aft. 9 in the morn.  
 Full Moon the 31 day, a little aft. 2 in the morn.

**D R O S** Now regarding the Wind and  
 Weather, Graft, cut Quicksets,  
 cover the Roots of Fruit-trees  
 (open'd in *December* and *January*)  
 with fat Earth; sow Oats, Barley,  
 Parsnips, Onions, Carrots, Melons,  
 Cowcumbers, and all kind of Pot-  
 Herbs, Slip Hartichocks and Sage,  
 and sow all manner of Garden  
 Seeds.

Now advise with the honest and  
 able Astrological Physician; it is  
 good to purge and let Blood, for in  
 this Moneth the Humors and Blood  
 increase, and gross Feeding breed-  
 eth gross Blood and Humors; there-  
 fore use Meats of good digestion,  
 and such as afford good Juice and  
 Nutriment to the Body; forbear  
 all things Salt, purge the Blood by  
 Potions, and Blood-letting; sweet  
 Meats and Drinks are commend-  
 able. Be sure to eat in the morn-  
 ing before you drink.

This Moneth sow Hemp, and  
 Flax, Pole Hops, set and sow all  
 kindes of Garden Herbs. Restore  
 the liberty of the laborious Bee, by  
 opening her Hive. Bark Trees for  
 Tanners; and let good Huswives  
 minde their Gardens, and begin to  
 think of their Daries.

*In Gardning never this rule for-  
 get,*

*To sow dry, and set wet.*

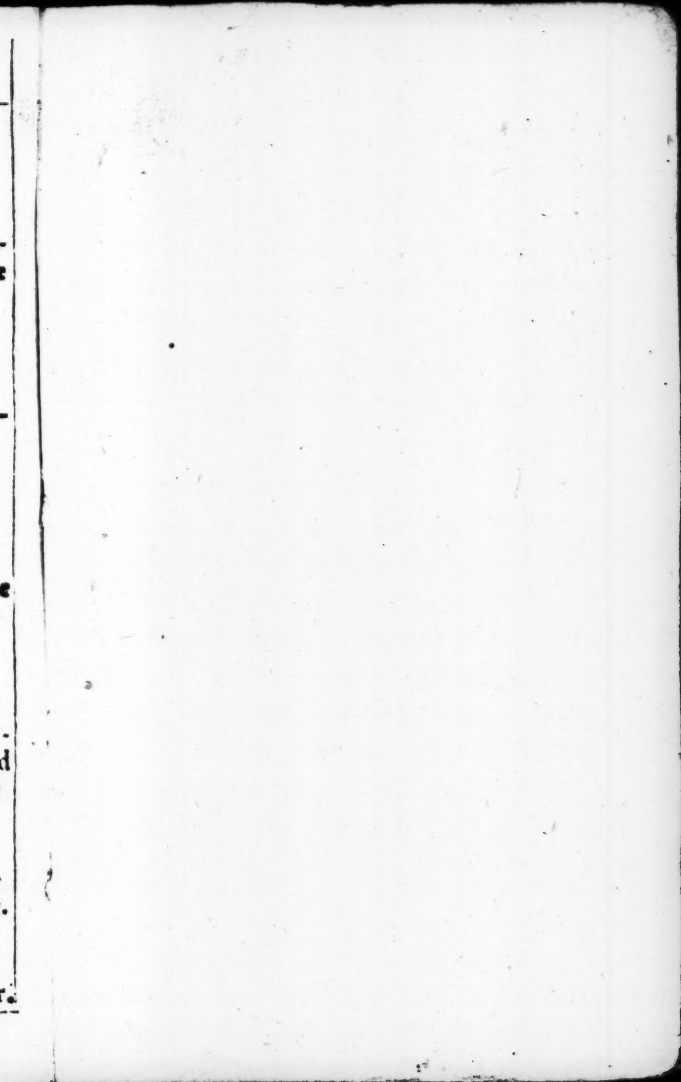

The ule of Physick becomes now  
 seasonable, as also Purging and  
 Blood letting. It is good to abstain  
 from Wine, for many Diseases will  
 be taken thereby, to the ruine of  
 many.

This Moneth the Pores of the  
 Body are open, and apt to receive  
 Physick; therefore this is the best  
 time to remove, and prevent causes  
 of sickness, or for speedy remedy in  
 extremities. Pray to God for a  
 blessing.

31	3	40	8	20

This Moneth commands the pro-  
 vident Housewife, and the prudent  
 Artista, to set their Stills on work.  
 In the beginning of the Moneth  
 sow and set those tender Summer  
 Herbs, that would not endure the  
 former cold. Weed your Hop Gar-  
 dens, cut off superfluous Branches.  
 Moss Trees and Gardens, and  
 weed Corn, rise early, and walk  
 the Fields and Gardens.

Now every Garden and Hedge  
 affords thee Food and Physick. Rise  
 early, walk the Fields by running  
 streams, the North and West sides.  
 Sage and Sweet-Butter, an excel-  
 lent breakfast. Clarified Whay with  
 Sage. Scurvy-Grass, Ale, and  
 Worm-wood Beer, are wholsom  
 Drinks. Green Whay excellent  
 against Choler. Eat and drink be-  
 times in the morning. Abstain from  
 Meats that are hot in Nature, and  
 Salt in Quality.

At the Full of the Moon, this Moneth and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish, three or four days after the Full, and they will not run to Seed. Shear your Sheep the Moon increasing. Take heed of cutting Herbs or Flowers with Knife, but rather gather them with your Fingers.

Let honest moderate Labor and Exercise procure your Sweat. Use thin and light Diet, and chaste Thoughts, tend to health. Lie not unadvisedly on the Ground, or overhastily drink.

Distilling of Roses, and making of Syrrups and Conserve are now in prime: Use a light and thin Diet, for the Stomach is weaker now then in the former Moneths; Clarified Whay boiled with cold Herbs, very wholesome.

# July hath xxxi days.

# Observations on July.

Last Quarter the 4 day, after 10 at night.

New Moon the 12 day, 30 m. past 4 afternoon.

First Quarter the 19 day, at high noon.

Full Moon the 26 day, at 3 afternoon.

**D O R O S**

Get Rue, Wormwood, and Gall,

1	3	49	8	11	to strew on your Floors, to destroy
2	3	50	8	10	Fleas. At the Full Moon gather
3	3	51	8	9	Flowers and Seeds, dry your Flow-
4	3	52	8	8	ers rather in the shade, than in the
5	3	53	8	7	Sun, which too much exhaletheir
6	3	53	8	6	vertue; but to avoid corruption,
7	3	56	8	4	let the Suns heat a little visit
8	3	58	8	2	them.
9	3	59	8	1	
10	4	0	8	0	

Beware of violent heat, and

11	4	1	7	59	sudden cold, which are the great
12	4	2	7	58	distempers of this Moneth, and pro-
13	4	3	7	57	duce pestilential diseases: Forbear
14	4	5	7	55	superfluous drinking, but eat hearti-
15	4	7	7	53	ly: Use cold Herbs and Meats, ab-
16	4	9	7	51	stain from Physick. Now the Rivers
17	4	10	7	50	are more wholesome then the Baths.
18	4	12	7	48	In time of Pestilence keep your
19	4	13	7	46	Chamber Windows shut till the Sun
20	4	16	7	44	have force of shining. Perfume
21	4	17	7	43	your Chamber every morning with
22	4	19	7	41	Tar upon a Chafing-dish of Coals:
23	4	21	7	39	Use <i>Cardus Benedictus</i> boiled and
24	4	23	7	37	drank fasting.

Now with thankfulness reap your desired Harvest. Sow Winter Herbs in the New of the Moon. Esteem fair weather as precious, and mispend it not. Gather Garden Seeds near the Full. Use moderate Diet, forbear to sleep presently after meat. Take heed of sudden cold after heat.

Beware of Physick and Blood-letting in the Dog-days, if the Air be hot; otherwise, if occasion require, you may safely make use thereof. Now moderate Diet is best, beware of Surfeits, Heats, and Colds, for Plurifies are ingendred thereby. Use not to sleep much, especially in the afternoon, for that brings Opilations, Headach, Agues, and Cathars; and all noxious distempers of the same kind. Red Wine and Claret are excellent Remedies for Children against the Worms.

The beginning of this Moneth, and the end of the former, gather Hops, their Complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and set all slips of Flowers, between the two Lady days; remove Trees from September till February, especially in the new of the Moon. The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit, Sow Wheat and Rie, Winter Parsnips and Carrots; and set Roses, Strawberries, and Barberies.

Now as the year declines, provide your Winter Garments, hang them on loosely, to prevent that you might after repent of: Good for Physick and Phlebotomy.

Set Crabtree Stocks to graft on.

In the old of the Moon, set Pease and Beans, and sow Parsnips and Carrots. Trench Gardens with Dung, uncover the Roots of your Apple-trees, and so let them remain till March. Kill Swine in or near the Full of the Moon, and the flesh will the better prove in boiling.

The best Physick this Moneth, is good exercise, warmth, and wholsom Meat and Drink: But if any distemper afflict the body, finish your Physick this Moneth, and so rest till March, unless necessity urge. Use good Meat and wholsom Drinks to nourish the Blood. Be sure to go dry of your Feet; for if you go wet of your Feet (unless it be those always used to it) be certain to be troubled with Rhume and Cold, and other inconveniencies attending.

Of Eclipses this present year 1675.

**T** Here will be five Eclipses this year, two of the Sun, and three of the Moon. Those of the Moon, and the first of the Sun, will be seen of us, if the Skie be clear.

The first will be of the Moon, the first of *January*, about eight at night of near three hours continuance, a great Eclipse.

The second Eclipse is of the Sun, the thirteenth of *June*, about six a clock in the morning; it begins after four, and ends after seven in the morning, and will in part be seen of us (if the Skie be clear) but much more visible to the South, and South-East parts of the World.

The third Eclipse is of the Moon on *June 27*, about four a clock in the morning, and may be partly visible to us, but not much, because the Sun riseth before the Eclipse is ended.

The fourth is of the Sun, the sixth of *December*, but not visible in our Horizon.

The fifth Eclipse is of the Moon on the 22 of *December*, near four a clock in the morning. This may be visible to early risers, but it will be but a small Eclipse.

The Description of Four Quarters of the Year

**T** He Spring begins this year the tenth of *March*, a little before ten a clock in the morning, the Sun then entering the first Scruple of *Aries*, equalizing day and night.

The Summer Quarter begins the eleventh day of *June*, near one a clock in the afternoon, making to us the longest day, and shortest night in the year.

The Autumn Quarter begins, the Sun cutting the *Æ*-quator in *Libra*, *September 13*. half an hour after four in the morning, making day and night again equal.

The Winter Quarter takes beginning the eleventh day of *December*, near four a clock in the afternoon, the Sun then entering the Southern Solstice *Capricorn*, making the shortest day and longest night in the year on this side the *Æ*quator.

A true and plain description of the High-ways in *England* and *Wales*.

From London to Cambridge 44 miles,  
thus accounted ;

From London to Waltham 12 miles, thence to Ware 8 miles, thence to Puckridg 5 miles, thence to Barkway 7 miles, thence to Fulmire 6 miles, thence to Cambridge 6 miles.

From London to Oxford 47 miles, thus ;

THE ROYAL  
**Almanack :**

O R,

**A DIARY** of the true Places of  
the Sun , Moon , and Planets , their  
Rising, Southings, and Setting, **High-water**  
at *London-bridge*, with Rules to serve other  
Places after the **New Theory** of Tides,  
and Directions of Sir **JONAS MOOR.**

To which are added

**The Eclipses, Tables of the Suns**  
Rising , Moons Southing , Moons  
Rising and Setting.

**A Table of the Suns Right Ascension in**  
time for every day at Noon , and of  
thirty one of the most notable fixed Stars.

**With the Moon and other the Planets**  
Appulses to the fixed Stars, for the Meridian  
of **LONDON** , *Anno 1676.* and of his Maje-  
sties Happy Reign 28.

**All done with great Pains, according to**  
the Rules of Art, for his Majesties Use ; and  
at his Command.

By *N. Stephenson*, one of his Majesties Gunners.

**L O N D O N :**

Printed for the Company of Stationers, 1676.

## An Explication of the Pages of the ALMANACK.

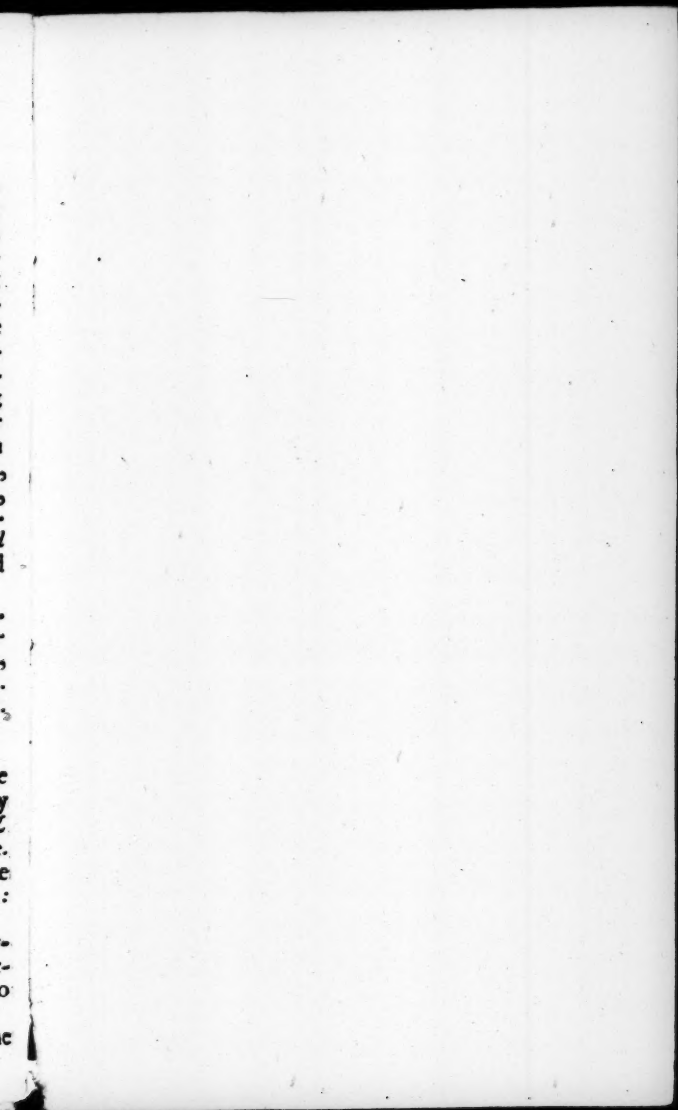

**E** Very month has two, the left and right hand Pages. The right hand Page contains 7 Columns. 1. The days of the Month. 2. The Dominical Letter, and other letters for the Week-days. 3. The Festival, notable days; the time of the Rising, Southing, and Setting of the Planets, where  $\text{♄}$  stands for *Saturn*,  $\text{♃}$  for *Jupiter*,  $\text{♂}$  for *Mars*,  $\text{♀}$  for *Venus*, and  $\text{☿}$  for *Mercury*. 4. The  $\odot$  place. 5. The  $\sphericalangle$  place. 6. The  $\Delta$  latitude, Septentrional or Meridional. The 7th. is the time of High-water at *London-bridge*, and at *Timmouth* (much differing from the ordinary Accompt) and observing to add or substract the time set to the places following, to or from the time in this Column serves at those places. *Barwick*, *Flushing*, and *Hambrough*, add 45'. *Cork*, *Severn*, *Calice*, add 1 h. 30'. *Falmouth* and *Humber*, add 2 h. 15'. *Plymouth*, *Hull*, *Lyn*, add 3 h. *Bristol*, add 3 h. 45'. *Milford* and *Landsend*, add 4 h. 30'. *Portland* and *Dublin*, add 5 h. 15'. *Pool*, *Dunbar*, and *Deep*, add 6 h.

But for *Gravesend*, *Downs*, and *Scilly*, substract 1 h. 30'. *Rocheſter* and *Black-Tail* substract 2 h. 15'. *Sheerness*, *Southampton*, and *Portsmouth*, substract 3 h. *Rye*, substract 3 h. 45'. *Yarmouth* and *Dover*, substract 4 h. 30'. *Needles*, *Orford*, *North* and *South Forlands*, substract 5 h. 15'. Note M stands for Morning, A Afternoon.

The right hand Page has 7 Columns at the top; the first Column has the first day of each Month, and every fifth day more. 2. has  $\text{♄}$  place: 3. his latitude: 4.  $\text{♃}$  place: 5. his latitude: 6.  $\text{♂}$  his place, and 7. his latitude. Below 5 Columns; the first contains the days of the Month: the 2  $\text{♀}$  place: 3. her latitude: 4.  $\text{♀}$  place: 5. his latitude.

Note that *France*, *Italy*, and many other places beyond the Seas that follow the New or Gregorian Accompt, precedes ours by ten days; so that adding ten to ours, you have the foreign Accompt.
